**Subject:** Hardin CPE report

Hi, David: We have completed our CPE at the Hardin WWTP. I am having Jenn send you a file with the report shortly.

We are working with the City of Hardin to optimize WWT plant performance with regard to nutrient removal. Our operations optimization contractor, Grant Weaver, has met with the Hardin staff to discuss options for process control changes. Overall, we expect to see lower energy costs and improved effluent quality among other advantages.

Please call or e-mail with any questions, suggestions, or comments.

Thanks.
